

MANUFACTURING COMPANIES

CALL THE STRATEGIC EARLY WARNING NETWORK

SEWN Can Help

SEWN provides FREE consulting services to small- to medium-sized manufacturers. SEWN is funded through the PA Department of Labor and Industry, not by its clients. SEWN's services save jobs, companies and communities.

SEWN works with manufacturers and with companies that directly support area manufacturers. SEWN can not work with retail, wholesale, construction or other service companies.

SEWN helps companies experiencing financial problems. SEWN works with the company to resolve cash flow and working capital issues, bank and/or other creditor issues and declining profits.

SEWN guides companies through ownership transitions. SEWN assists family members, employees and/or management to buy out an existing company, keeping the jobs in the community.

SEWN analyzes operational challenges. SEWN engages workers and management to design appropriate solutions for companies struggling with productivity losses that are adversely affecting their ability to survive.

SEWN explores new revenue streams. SEWN assists in discovering new customer, industry and product venues for mature companies straining to maintain financial stability in an ever-changing marketplace.

SEWN draws on the strengths of its partners. SEWN leverages its services with its network of public and private partnership resources throughout Pennsylvania with four regional offices—Pittsburgh, Harrisburg, Bethlehem and Philadelphia.
