

In the near future, I will be introducing a series of bills to provide much-needed tax relief for Pennsylvanians and their families during these difficult inflationary times.

This bill will reduce the Inheritance Tax for Lineal Descendants and siblings from the current 4.5% and 12% to align with the Pennsylvania Personal Income Tax and any future changes to it. Lineal heirs are grandfather, grandmother, father, mother, and their children. Children include natural children, adopted children, or stepchildren.

Please join me in cosponsoring this legislation to provide tax relief for Pennsylvanians and their families.
